-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

**DETAILED ACTION**

**Election/Restrictions**

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1- 8 are drawn to training devices, classified in class 473, subclass 505.
- II. Claims 9-12 are drawn to a sport stick with a rod, classified in class 473, subclass 513.
- III. Claims 13-18 are drawn to a sport kit, classified in class 473, subclass 505.
- IV. Claims 19-23 are drawn to a sport stick having an end cap, classified in class 473, subclass 513.
- V. Claims 24-26 are drawn to a method of using a ball collecting apparatus, classified in class 473, subclass 513.

Inventions I-IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as a support arm, invention II has separate utility such as a pool cue, invention III has separate utility such as a weight kit, invention IV has separate utility such as a replaceable sport handle.

Inventions I-IV and V are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different

Art Unit: 3711

process of using that product (MPEP § 806.05(h)). In the instant case the method calls for a rod member with a bumper, the apparatus can be made without a bumper.

Note: that if applicant elects the product and the product is subsequently held allowable, then the method claims will be rejoined if the same structure is added to the method claims i.e. modifying the method step to positively recite the apparatus in the preamble or adding the step of utilizing the apparatus of claim X in the body of the claim.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
